Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-2,6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Imaizumi et al.

Imaizumi et al. teach a fixing device comprising a sheet separating device disposed toward the discharging side of the fixing device having claw 3 biased into engagement with a fusing roller via a spring 20. As seen in Fig. 6(b) the claw has rounded corners. Further, as seen in Fig.5, the tip of the claw is chamfered .

2. Claims 1,3,5,6,8,10 are rejected under 35 U.S.C. 102(b) as being anticipated by Leo et al.

Leo et al. teach a fixing device comprising a sheet separating device disposed toward the discharging side of the fixing device having claw 92 biased into engagement with a fusing roller via a spring 80. As seen in Fig.3, the claw has rounded corners 102. Further, as seen in Fig.5, the tip of the claw is chamfered . The claws can be made of thin sheet metal formed by a die stamp (press) (col.5, lines 42-45.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leo et al.

Leo et al. taught supra discloses most of what is claimed except the thin metal being stainless steel. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use stainless steel as the metal material because steel is a non-brittle material which has a long life of which the examiner takes Official Notice.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cahill, Kamiya, and Weiler et al. teach various separating claws.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Beatty whose telephone number is (571) 272-2130. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley, can be reached on (571) 272-2136.
